ABI SYBR GREEN Master Mixes Choice

PowerUp™ SYBR™ Green Master Mix

One universal master mix for all qPCR instruments

- Exceptional specificity with dual hot-start mechanism
- Tight reproducibility in C_t s over a broad dynamic range
- Compatible with standard or fast cycling for results in <50 minutes

PowerTrack™ SYBR™ Green Master Mix

Easy-to-use and flexible gene expression master mix for real-time pcr

- Two-color tracking dye system indicates where pipetting has occurred
- Broad primer T_m and primer concentration compatibility allows flexibility in qPCR reaction setup with minimal optimization
- Superior specificity and tight reproducibility in C_t values over a broad dynamic range
